atozeesolutions.

ERP Development

ERP development : AtoZeeSolutions offer the best ERP software solutions helpful in manufacturing and trading companies in SME sector for assimilation and automation of the business proceedings. With easy and timely accessibility of information it's easier to enhance the growth and efficiency of an organization. With years of industry experience and technical expertise we design ERP software that best meets the requirements of many businesses. With our ERP software we help organizations in streamlining their processes and improve profit margins. At the same time also allow organizations to keep pace with ever-changing technology.

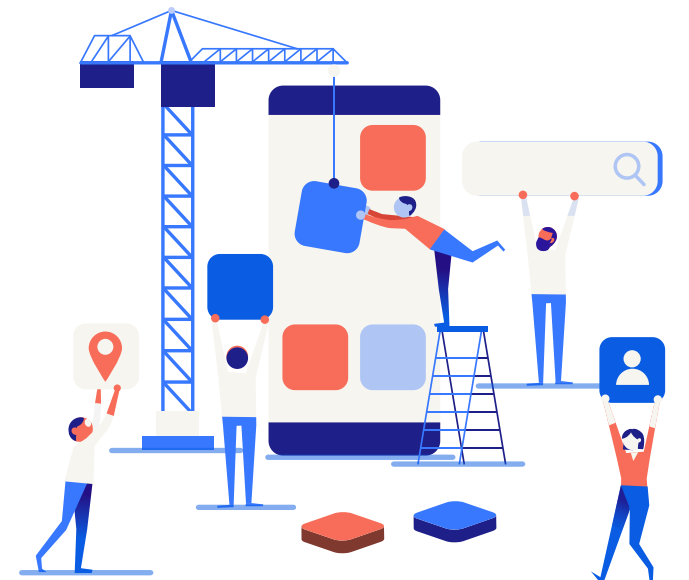

Few of the advantages of having customized ERP software

- *Keeping All Data in One Location*
- *Process Automation*
- *Comprehensive Reporting*
- *Customer Service*
- *Enhanced Security*
- *Regulatory Compliance*

Mobile Development

Every business owner wants its business to be handy for its vendors and customers. AtoZeeSolutions's mobile development centre is expert in providing uncomplicated mobile experiences. We cover the following platforms

- *Android*
- *iOS*
- *Cross Development*

atozeesolutions.

CRM development

Maintaining solid customer relationships is essential, but with hundreds, maybe thousands, of customer touch points, it is nearly impossible to remember every detail of every conversation. CRM integrates these channels to provide your sales, marketing, and service personnel a 360 degree view of the customer across the full lifecycle of the process. Our domain technical expertise follows business-backward approach to understand client's requirements and ensure successful implementation of every module. Our development solutions covers the following industries

- Financial Services
- Manufacturing
- Logistics
- Insurance
- Hospitality and many more

Integration

AtoZeeSolutions finely communicates with its clients to understand their challenges and how to integrate effective solutions to help achieve their goals. Our integration methods not only complement the existing system but also enhances the overall performance.

atozeesolutions.

BI Services

AtoZeeSolutions brings value to the companies that want to quickly turn their data into actionable insights and don't plan to dive into technical details.

We built domain specific data models and refine them over a period of time to address the critical business questions.

This drastically reduces the time-to-decisions and also provides a ready-to-go framework which can be deployed in weeks rather than months. Since every client is different, the solution would be customized to meet the specific needs of the client.

Another key aspect of BI implementation is Quality of data. It is difficult to take informed decisions if the data is not accurate. Our ETL methodology includes multiple levels of data cleansing and auto fixing known issues. We follow stringent data validation processes at each level including validation of transformation rules for accuracy.

Framework Services

AtoZeeSolutions provides frameworks which are equipped with fascinating features such as session management, database, templates, and database access libraries. These frameworks enhances the activities of the website by increasing their efficiency. AtoZeeSolutions offers modular and flexible development solutions which has scalable options to make development process smooth and easy. Our framework models includes features such as

- *High Scalability and Flexibility Manufacturing*
- *Dynamic and High-Quality Web Features.*
- *Versatile Code Handling*
- *Hospitality and many more*
- *Range of Modeling Techniques*
